noteworthy builders, architects
& designers

Shaw Woodworking, a manufacturer of custom cabinetry and millwork in Pocasset, was named among the top 100 woodworking companies in North America by leading trade magazine Wood & Wood Products. Shaw Woodworking was recognized by the 115-year-old publication for providing LEED point-seeking customers with a formaldehyde-free hardwood plywood option that uses PureBond technology. “We are fortunate to have a wealth of skilled and dedicated craftsmen working for us,” Shaw said about the recognition. “Our employees have embraced the CNC equipment we have added in recent years which has helped us break into new markets.”
